#### **Features**

Zoostorm 4-6702 Advanced Home Laptop is an excellent value 17" widescreen laptop. Its also extraordinarily fast laptop that will cope with all home applications and games. Built in wireless 54mbps LAN is coupled with the superb Core Duo T7200 2.0Ghz CPU to give you excellent battery life and wireless freedom.

A laptop for the home should be fast and have a large clear screen. This is why many users choose a 17" laptop for home use. If you don't often need to carry the laptop to business meetings then you won't mind the extra size. Weight is still kept to a minimum by the use of light aluminium chassis.

This Laptop is great for anyone who wants raw power in their laptop, but without sacrificing battery life. The Core Duo processor is backed by 1GB DDR2 memory to give you extraordinary power for home and office applications and games. This is complimented by a massive 120GB hard drive and a great DVD+/-RW Double Layer optical drive.

The display on this laptop is a 17" widescreen model with a resolution of 1,440x900, perfect for watching DVDs or working on 2 documents side by side. The backlight is excellent and bright, but if you do want to connect this laptop to another monitor it features a DVI socket built in.

The screen is powered by 256MB ATi Mobility Radeon X1600 which means you can even use this laptop for gaming and using standard settings on Doom 3 for example, you can achieve frame per second rates of around 28, which is extremely playable.

As usual, you will benefit from Zoostorm's award winning build quality and Microsoft Windows XP Home edition is preinstalled for easy set up. This Laptop has everything you will need for advanced home and mobile computing - now and in the future.

Specification:
